

New historical fiction novel summarizes collection of John F. Kennedy assassination suspects

***The Scrapbook Lecture ...a collection of suspects* by Gary B. Haley reveals why so many may have wished ill upon one of America's most popular presidents**

DENVER – In *The Scrapbook Lecture ...a collection of suspects*, author Gary B. Haley uses the setting of a college history lecture to catalogue the events and decisions that led to one of the nation's most tragic moments. Haley takes great effort to portray the events leading up to the assassination of John F. Kennedy as accurately as possible while weaving fictional characters in place which he feels helps tell this otherwise complicated story.

The Scrapbook Lecture takes place during a presentation given by a professor at a Dallas university. The professor has been given an old scrapbook containing articles, photos, and history that highlights the life of JFK. The scrapbook and its corresponding lecture take students living in the year 2038 back through the events leading up to the assassination.

Haley said that he has always been intrigued by the circumstances surrounding the assassination of JFK, so it was just a matter of time before he combined his research on the subject with his love of writing historical fiction to create his latest book. "*The Scrapbook Lecture* brings to light some interesting yet little known JFK history," Haley says. "This November will mark the 46th anniversary of President Kennedy's assassination, which is a unique milestone, as he was 46 years old at the time of his death. I thought this book would be an honorable tribute to his life and his many contributions to humanity."
